## Carbon Reduction Policy Statement

Nuko Planning Ltd recognises the importance of reducing greenhouse gas emissions and operating in an environmentally responsible manner. As a small, office-based planning consultancy, we are committed to minimising our carbon footprint and supporting the transition to a low-carbon economy.

### Our Commitment

We are committed to:

- Reducing energy consumption associated with office operations
- Minimising business travel emissions where practicable
- Promoting sustainable working practices across our projects
- Reviewing and improving our environmental performance over time

### Key Measures

To achieve this, we:

- Operate primarily through cloud-based systems (Google Workspace), reducing paper use and physical storage
- Encourage remote meetings where appropriate to reduce travel
- Use electronic document management and digital submissions wherever possible
- Promote sustainable transport choices for site visits where feasible
- Seek to work with consultants and suppliers who demonstrate responsible environmental practices

### Monitoring and Review

Given our SME scale, our emissions are primarily associated with electricity use, business travel and supply chain activities. We will review our operational practices periodically to identify further opportunities for carbon reduction and improve efficiency.

Nuko Planning Ltd is committed to continual improvement in environmental performance and supporting sustainable development through both our internal operations and professional services.
